Course description

From soft tissue removal and repair through to managing bone loss of the glenoid, the Smith & Nephew Advanced Shoulder Arthroscopy programme blends classroom learning with case discussion and hands-on experience in a state of the art facility. Participants will hear lectures on current concepts, be encouraged to engage in debate, and perform advanced techniques in the wet lab. Participants can expect to leave the course with fresh ideas to take back to the operating room.

We look forward to seeing you at the event!
